Summary

Cloud Data Engineer with 2+ years of experience building and maintaining production ETL/ELT pipelines on Azure Databricks, Snowflake, PySpark, and Azure Data Factory, processing 10M+ records for enterprise reporting and analytics. Proficient in SQL and Python for data transformation and pipeline development, with hands-on exposure to cloud data platforms, Git-based version control, and CI/CD practices. Strong track record of enforcing data quality, documentation, and engineering standards, with a growing interest in agentic AI data readiness and Finance automation use cases.

Technical Strengths

Cloud & Storage: Azure Databricks, Azure Data Factory, Azure Data Lake Storage, Snowflake, Azure DevOps

Processing & Languages: PySpark, Spark SQL, SQL, Python

Engineering Practices: Git version control, CI/CD (Azure DevOps), data quality validation, pipeline documentation

Tools & Orchestration: Databricks Workflows, Control-M, SSMS

Experience

Tata Consultancy Services **June 2024 - Present**

Cloud Data Engineer *Kolkata, West Bengal, India*

- Developed and maintained production ETL pipelines in Azure Databricks and Snowflake processing 10M+ records across 1000+ files, enabling reliable enterprise reporting and analytics.
- Designed and deployed Medallion Architecture (Bronze, Silver, Gold layers) in Databricks, improving query performance by 35% and enhancing data maintainability.
- Orchestrated daily workflows using Azure Data Factory and Control-M, automating 1000+ file-processing tasks while ensuring SLA compliance and reliable job scheduling.
- Implemented data quality validation checks and pipeline monitoring practices, supporting SLA tracking and enterprise engineering standards.
- Engineered enterprise-grade data masking and encryption frameworks protecting 10M+ sensitive records and improving compliance adherence across production environments.
- Streamlined Spark SQL transformations and workload execution strategies, reducing processing time by 35% and optimizing resource utilization.
- Reduced manual effort by 30% through automation of dependency detection and parameter extraction, using Git for version control and Azure DevOps for CI/CD.
- Maintained pipeline documentation and transformation specifications; participated in peer code reviews and sprint ceremonies.

Education

Chandigarh University **August 2020 - June 2024**

Bachelor of Engineering in Computer Science (CGPA: 7.98) *Punjab, India*

Projects

Walgreens Healthcare Data Platform | *Azure Databricks, Spark SQL, Snowflake*

- Built scalable ETL pipelines to ingest structured and semi-structured healthcare data into Snowflake, supporting analytics across millions of records.
- Enhanced warehouse query performance and data availability through query tuning and optimization techniques.

E-Commerce Store Data Pipeline | *Databricks, Azure Data Factory*

- Designed Medallion Architecture (Bronze, Silver, Gold layers), improving data quality and analytical query performance.
- Standardized reporting workflows through automated data processing pipelines, improving consistency and reliability of business reports.

Certification

Databricks Certified Data Engineer Associate Verify

Achievements

- **Applause Awards:** Awarded twice for timely deliveries and high-quality services on projects for a major pharmaceutical client; key tools used included Databricks, Snowflake, and Azure Data Factory (ADF).
- **Spot Award (2x):** Recognized for delivering high-quality data solutions on a pharmaceutical project using Azure Databricks, Snowflake, and Azure Data Factory.
